APR Compost Heaps

Compost Heaps

Compost Heaps made from APR wood plastic composite planks are the perfect addition to any truly green home.

Using 200mm x 100mm or 200mm x 50mm planks you can create and protect an area in your garden or property that is dedicated to green waste, perfect for turning to compost for the garden.

Just like wood, plastic or metal, APR can be easily fixed into position, but they won't rust, rot, splinter or break.

And of course, because our products are made from 100% recycled plastic and wood, you'll be saving even more waste material going to landfill, and helping the environment that little bit extra.

Organic compost waste inside, recycled plastic waste outside...it doesn't get any greener than this!

Independent test results from NATA accredited laboratories:

Dry Flexural Testing

Loading speed: 30mm/min Support span: 900mm
Maximum Flexural Strength: 3.86kN // 393.6kgf

Wet Flexural Testing

Loading speed: 30mm/min Support span: 900mm
Maximum Flexural Strength: 3.88kN // 395.6kgf

Screw Withdrawal Testing

Test method: ASTM D6117
Maximum Force face: 1741 MPa
