Dandenong Ranges, Victoria

Gold Coast, Queensland

Newcastle, New South Wales

APR's *ecocomp* range of bollards are manufactured utilising recycled and reclaimed materials. They will not rot, rust, splinter or leach chemicals into the environment, therefore providing the perfect long term, environmentally sound solution for delineating pedestrians and vehicles.

APR's extensive range of WPC bollards offer both visual appeal and durability and include round, square and rectangular profiles. Some bollards are also offered as a hollow profile, allowing a cost-effective option which is also lighter and easier to handle.

All APR products are custom designed, engineered and manufactured in Australia to your specific needs, which means you get exactly what you need with *no waste*. They are also easy to install and require very little maintenance, if any at all.

Minyon Falls, New South Wales

Athelstone, South Australia

Port Noarlunga, South Australia

Adelaide, South Australia
