

Wood Plastic Composite (WPC) Signs & Display Markers

Are you looking for a signage solution to navigate and inform visitors in your area?

Effective signage is an important feature in parks and open spaces for clear communication and information sharing. APR offers a wide range of sturdy and long lasting signage solutions specially designed to withstand harsh outdoor environments whilst maintaining strong visual impact over time. Manufactured in Australia from **durable recycled materials** (kerbside plastic and sawmill waste), WPC is a sustainable timber alternative with the following benefits:

- ✓ Water resistant – won't rot or rust
- ✓ UV stabilised - resists fading
- ✓ Low maintenance
- ✓ Termite & graffiti resistant
- ✓ Safe handling – no sharp edges or splinters
- ✓ Chemical free

WHY CHOOSE APR PRODUCTS ?

APR is an approved 100% Australian-owned business manufacturing WPC products in Australia suitable for the Australian climate. By choosing to buy locally made products you are helping to keep profits in Australia whilst supporting local jobs and local business.

Do your part for the environment

Every lineal metre of WPC diverts plastic waste from landfill and oceans.
